

AD **EQUIPMENT** HIGH-PERFORMANCE EXCAVATOR ATTACHMENTS

Reaching Worldwide

ATTACHMENT EXPERTS

A&D Equipment are experts in heavy excavator attachments. We support commercial, municipal, state, federal, DOI, USACE, and DoD clients. As owners and operators of an excavating company for over 50 years, the products we sell are the *same products we depend on every day*. We offer a superior line of attachments based on years of field experience, global research, extensive product testing, and our strict demands of performance, safety, and sustainable technology.

A TOOL FOR EVERY EXCAVATOR AND PROJECT

We carry five product lines with a wide range of models. Model sizes range from attachments for light and compact projects, up to heavy excavation and demolition. Our products are used to support military ground operations, humanitarian projects, disaster relief, public land management, and environmental sustainability. We have served customers in over 47 states, including Hawaii, Alaska, and Puerto Rico. Several of our products are being used OCONUS. Our attachment lines are specifically chosen based on speed, innovation, durability, and longevity.

MATERIAL RECYCLING. DEMOLITION. MINING. LAND MANAGEMENT. RENEWABLE ENERGY. DISASTER RELIEF. MUNITION RETRIEVAL.

- We have provided 15 Rotastar screening and Tiltrotator attachments to the U.S. Army for DoD Humanitarian Demining projects OCONUS.
- We have recently developed and provided the DoD with a customized submersible Rotastar screening bucket to extract munitions in waterways.
- We have provided products to the DOI Bureau of Land Management, the USACE Districts, and Kansas Air National Guard for public land management, disaster risk reduction, and environmental protection.
- We have supported the U.S. Air Force by providing products to help prepare warfighters.
- We are supporting a State of Michigan solar panel installation project spanning more than 350 miles and 22 National Gypsum plants across the country to assist with material screening.
- We are supplying U.S. steel manufacturers with crushing attachments to sustain refractory product recycling.
- We have supplied land management and waste recycling attachments to several municipalities from Connecticut to Wisconsin.
